## Investment strategy

The balanced version of our ESG Dividend portfolio.

This Balanced portfolio holds approximately 30% fixed income in the form of well-diversified actively managed ETFs with sustainable criteria. The 70% equity portion mirrors the ESG Dividend portfolio with exclusively Canadian Dividend paying stocks, all of which pass our stringent positive screening to identify companies that exceed high Environmental, Social and Corporate Governance (ESG) standards while still providing an approximately 4% dividend yield, on top of long-term growth.

We use a strict Environmental, Social and Corporate Governance (ESG) overlay to create the "Blue Heron Investable Universe". We then employ a disciplined active approach that combines qualitative and quantitative research. We also overlay Equity Action Call research to better control risk in volatile markets. Companies are added and deleted using a strict rules-based methodology.
